OFFICIAL POLICY Contractor Use of System radios

DATE: November 28, 2000

PURPOSE: To provide certain contractors with direct communications to City/County/CSU agencies that have been awarded specific dedicated contracts.

SCOPE: Agencies using contractors to meet agency work requirements.

GENERAL DESCRIPTION:

While a contractor is performing their contractual agreement, and when there is a need to communicate to the contracted department the contractor can be authorized to use one or more talkgroups of the sponsoring agency's talkgroup/s, only for the specific reason cited in the contractual agreement.

The Sponsoring agency will request permission from the System Manager in writing, of the contractor name, the number of radios and the time frame required to put units on the system.

Contractors will be provided, and assigned, radios from the sponsoring agency.

Note: If the contractor does not already meet the FCC license authorization use, then authorization by the Federal Communications Commission must be meant prior to any contractor being allowed on the system.
